Academic Projects

- College Website** - I built a college website using HTML, CSS, Bootstrap, jQuery, PHP, and MySQL. It has a Home page featuring college info and a chatbot for Aurangabad Municipal Corporation, and a Contact Us page. The project showcases my ability to use various technologies to create functional and visually appealing websites.
- Facial Age Detection** - This project combines cutting-edge deep learning techniques, such as CNNs and pre-trained models, with a user-friendly GUI implemented using Flask. By bringing together these components, it provides a convenient and accurate tool for age detection based on facial images.
